Please find below and/or attached an Office communication concerning this application or proceeding.

		Application No. Ap		Applicant(s)	pplicant(s)	
	Office Action Commercial	10/781,29	94	REED ET AL.		
	Office Action Summary	Examiner		Art Unit		
		Terry A. M		1636		
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The use of "biologically active PAN6 polypeptide" in claim 1 renders the claims vague and indefinite because "biologically active" is defined by the specification (pages 23-24) as a modifier of the PAAD domain-containing polypeptide (PAN6, SEQ ID NO:24 in the instant case) and refers to a polypeptide that exhibits functional characteristics similar to at least a portion of (PAN6). The specification indicates several activities that are included, but leaves the definition open to other, unspecified and thus vague and indefinite, activities. Thus, the metes and bounds of the polypeptides encompassed by the phrase are unclear, especially with regard to PAN6.

Art Unit: 1636

Amending the claims to recite the specific biological activities intended to be encompassed would be remedial.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 3-4, and 15-16 are rejected under 35 U.S.C. 102(a) as being anticipated by NIH-MGC.

NIH-MGC teach an mRNA and a corresponding cDNA clone cloned into a vector, pCMV-SPORT6, and the vector in a host cell, MGC36 (Features section). The cDNA clone has the Accession Number of AW673661 which comprises a sequence that is 97.7% identical over a 571 nt length to SEQ ID NO:23. Because of the high sequence similarity over such a large length of nucleotides, it would specifically hybridize or hybridize under stringent conditions with the nucleotide sequence set forth as SEQ ID NO:23 or a nucleic acid that encodes SEQ ID NO:24. The cDNA clone reads a nucleic acid molecule that encodes a biologically active PAN6 polypeptide because the "biologically active" modifier is

Art Unit: 1636

specifically defined by the specification as including the ability to act as an immunogen for the production of polyclonal and monoclonal antibodies that bind specifically to an invention PAAD domain-containing polypeptide (PAN6) and the cDNA encodes such a long fragment of SEQ ID NO:24 (PAN6) that it is a fragment of PAN6 that would act as a specific immunogen for PAN6.

Conclusion

No claims are allowed.

Certain papers related to this application may be submitted to Art Unit 1636 by facsimile transmission. The faxing of such papers must conform with the notices published in the Official Gazette, 1156 OG 61 (November 16, 1993) and 1157 OG 94 (December 28, 1993) (see 37 C.F.R. § 1.6(d)). The official fax telephone number for the Group is 703-872-9306. NOTE: If Applicant does submit a paper by fax, the original signed copy should be retained by applicant or applicant's representative. NO DUPLICATE COPIES SHOULD BE SUBMITTED so as to avoid the processing of duplicate papers in the Office.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to (571) 272-0547.

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the The Patent Electronic Business Center will notify problem. applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.

For all other customer support, please call the USPTO Call Center (UCC) at 800-786-9199.

Any inquiry concerning rejections or objections in this communication or earlier communications from the examiner should

Art Unit: 1636

be directed to Terry A. McKelvey whose telephone number is (571) 272-0775. The examiner can normally be reached on Monday through Friday, except for Wednesdays, from about 7:30 AM to about 6:00 PM. A phone message left at this number will be responded to as soon as possible (i.e., shortly after the examiner returns to his office).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Remy Yucel can be reached at (571) 272-0781.
